

VELOCITY

CellCast

A NEW APPROACH TO CONNECTIVITY

VELOCITY: CellCast includes:

- Network monitoring and management 24/7/365
- Customized real time alerts and reporting
- Shared data pool across an organization
- Commercial-grade wireless router
- Strong, national, 4G/LTE coverage
- Service and hardware bundled into a reasonable per location monthly cost

As more and more businesses rely on the cloud for transactions, business critical services, and customer interactions, the network becomes increasingly important. In locations where infrastructure or bandwidth are not available from traditional sources, managed wireless services can be the key to keeping your enterprise connected.

VELOCITY: CellCast provides enterprise class hardware and the most reliable 24/7/365 service available. While quality hardware is important, it's the managed service that sets Microspace apart. Our advanced monitoring, control and reporting provide real benefits across any enterprise network. 24/7 visibility of your network means that connectivity or hardware issues are immediately identified and resolved from Microspace's award winning Network Operations Center based in Raleigh, NC.

VELOCITY: CellCast provides strong, national, 4G/LTE coverage and utilizes true enterprise grade equipment bundled into a reasonable per location monthly cost.

Pricing Options:

- Cradlepoint 4G LTE Wireless Enterprise Router
- Monthly Pooled Data Plans
- Microspace Network Control-Monitoring, Reporting and Support
- 2 or 3-Year Agreements Available
